

PRIMEURS 2021

CHÂTEAU DE ROCHEMORIN RED

2021 Rochemorin's red vineyard suffered very little from the climatic hazards in 2021. The yields are almost identical to a normal year. This is largely due to the great homogeneity of the vines and the way they are managed. This homogeneity in the vineyard is then reflected in the cellar, with a very homogeneous quality of the wines, concentrated and fruity, with very supple tannins. With this vintage, the first terracotta amphorae were used for the vinification of these reds.
